## School of Management Undergraduate Programme Overview

### Notes for undergraduate students on the selection of optional modules

Programmes contain modules that students study. Each module has a credit weighting assigned to it (15 or 30 credits). Students study 120 credits worth of modules each academic year, pursuing 60 credits in each one of the two semesters (September – December; January – May).

Programmes include core modules (a module that must be taken and passed) and compulsory modules (a module that must be taken) and in the second and third years also provide students the freedom to pick a certain number of optional modules. The number of modules that students may select varies by programme (and is shown in this document). There are some “non-credit bearing” modules which students may take in addition to their 120 credits in areas such as English language support, Employability skills and computerised accounting.

The selection of optional modules takes place in the Spring preceding the next academic year through “module pre-selection” conducted through the online student portal “MyUni”.

Students should find their programme in this booklet to look at the compulsory modules they will study next year and how many optional modules they can pursue. Students should then look at the separate “Undergraduate Elective Modules Overview” document to identify optional modules they wish to pursue. All documents and the full details on each of these modules is available online via the Student Information Office and the process is supported by a Module Selection Fair.

BSc Business Management (Management Consulting)	MN-1518 Operations Management
BSc Business Management (Business Analytics)	MN-1017 Essential Analytic Skills for Business
BSc Business Management (Human Resource Management)	MN-1006 Managing People

\* A core module is a module that students must take and pass in order to continue on that particular BSc Business Management pathway.

For each pathway on the BSc Business Management programme, one of the compulsory modules is also a core module. Core modules must not only be pursued but they must also be passed (a mark of 40% or higher) in order for students to progress on that particular pathway. Students have an opportunity to apply to change pathway at the end of the first year as all students on BSc Business Management programmes study a common first year. Applications to change pathway will be considered on a case by case basis and will depend on the student having met the progression criteria for the pathway i.e. they will need to have passed the required core module.
